

GAS CHARGED

TUFF SUPPORT

TUFF SUPPORT

Gas Charged Lift Supports

More and more vehicles, boats, and furniture are now equipped with lift supports.

Vehicles get old, and their lift supports lose the original charge, and therefore in many cases are NOT able to support the weight of the **HOODS, TRUNKS, BACK WINDOWS, BACK DOORS, HATCHES, TONNEAU COVERS, LIDS, TOOL BOX COVERS, BEDS** that they are supposed to carry.

Accidents are other major causes of failure of the Lift Supports, by damaging the integrity of its seals.

You will be able to tell if a particular lift support is not operating properly if the hatch, trunk, or hood does not stay up, and you will need more than normal effort to lift the hatch, hood, or trunk.

It is recommended that Lift Supports are replaced in pairs, since it is not possible to tell which Lift Support is damaged. If the wrong Lift Support is replaced, the new Lift Support will not work properly, and will deteriorate prematurely.

This catalog has been prepared as a result of an extensive market research, and most lift supports in our program are for direct replacement applications. Usage of the lift supports in different applications is proven to be dangerous.

TUFF SUPPORT "BB" Series...

TUFF SUPPORT "BB" TOTAL BLACK

- * BB series lift supports are manufactured with latest manufacturing methods.
- * Heavy gauge body is painted with special epoxy paint, and heat baked for long life.
- * Nitrided rods are hardened, polished, and then painted for long life and applications .
- * Custom colors, and paints on body are available on a case by case basis.

Also available...
